Introduction

Imagine: You and your friends plan on going to the new nightclub in town. You read it's a cryptocurrency only nightclub. You download an app Monday, purchase for \$100 crypto and wait until Friday. Now those \$100 are worth \$150 and you just got a couple extra drinks for free. Fine, but what else? Let's say you used almost all of your coins to purchase drinks. You only have a handful of coins left. You want the maximum value of your Mazecoins. You look and analyse the big TV screens on the nightclub showing the real time value graph of Mazecoin. You use your expert cryptocurrency knowledge and time the market - buy low, sell high. Maximum value.

What? You don't go to nightclubs or even live in Denmark? Even easier. You heard about the new cryptocurrency and invest before all the hype. Profit.

Why can't I just use normal FIAT currency at the nightclub? It's a cryptocurrency nightclub. Trading is fun. Cryptocurrency is fun. Nightclubs are fun, and *FIAT is not fun*. The night life is one of the few industries that has seen no significant innovation in a long time. This has changed with Mazecoin and the cryptocurrency revolution that is shaking the world market to its core.

Mazecoin trades on a growing number of exchanges. Right now we recommend following the "How to buy" guide on Mazecoin.dk or buying on Pancakeswap with Metamask or Trustwallet. We are developing an app that allows for easy, fast and low fee transactions between FIAT, MazeCoins and the drinks and services you will buy at the actual nightclub.

Crypto Marketplace

Over the past year, the use of cryptocurrencies, such as crypto tokens and other digital assets based on blockchain technology, has seen a period of rapid growth. Blockchain technology makes it possible for the first time to have a truly global store of value, and the number of wallets has seen a dramatic increase in the last few months. At the beginning of 2017, Bitcoin was at the top of the cryptocurrency world with a market capitalization of 12 billion US dollars. On paper, Ethereum was worth 700 million USD while it was still a relative newcomer to the cryptocurrency market. To start the year, Bitcoin's market value rose from 12 to 32 billion USD in just a matter of weeks. Ethereum also experienced an explosive rise during the first two months of the year, and as of April had a market value of 28 billion USD.

The market is enthused by blockchain technology and the decentralization of currency that blockchain technology and cryptocurrency provide. It is estimated that well over 4000 different cryptocurrencies currently exist, and each has a new use case for blockchain being created on a near-weekly basis. Selecting the correct cryptocurrency is essential, as there are important things to consider including checking if there is anything wrong with the team, the technology, or the concept.

Problem Statement

For decades Fiat currency has been the primary mode of transaction. The governments of the respective countries determine the exchange value of the Fiat money. The central bank of every country controls the regulations of Fiat money. The value of the currency may increase or decrease as per the stock market trading and depending on the people's trust.

There are some problems with the Fiat currency that need to be addressed. Fiat currencies are controlled by the government through a centralized authority. This simply means that authorities can have access to all of the transactions that you made. This is fine for some of the people who don't care about their privacy. But most people feel uncomfortable with this system of transactions. There needs to be decentralized currencies that can be used as a standard for buying and selling goods.

Though there are thousands of blockchain-based cryptocurrencies available, they too have problems of their own. For example, those crypto coins are still not available to use for buying and selling daily life goods, services, or even drinks at a nightclub.

Solution

The problems discussed above are getting more serious with each passing day. But Mazecoin provides the solution. Mazecoin provides a new way of paying for drinks and services at nightclubs. Mazecoin is the only way to pay for the things at the Maze nightclub.

Mazecoin doesn't just provide an alternative to paying with Fiat currencies at the nightclub, but it also provides other exciting benefits as well to the Mazecoin token holders. It provides a great opportunity for investors to invest in a decentralized currency made for nightclubs only. It can offer higher profit rates to the investors.

There are a lot of crypto coins already out there in the market. A lot of them have no purpose and value. There also exist some good coins as well with great market value handled by a team of experts. But until now, no crypto coin has been ever launched solely for nightlife and enjoying at the nightclub.

Benefits of Mazecoin

Mazecoin offers great benefits to the investors who buy Mazecoin tokens and hold them till weekends. On weekends, it can give a good amount of profit to the holders and investors. Mazecoin follows a simple trading strategy. Investors can buy Mazecoin tokens from the Maze app when the prices are lower. They can sell these tokens once the price goes higher. We don't know when prices will go up and down. One could argue that it would make sense for the price to increase Thursday/Friday/Saturday during the day, and fall during the night when people spend their MazeCoins to buy drinks, etc. All that being said, the market will probably regulate itself. It provides a golden opportunity for investors to earn handsome profits

during the week. The market value of Mazecoin depends upon how many people buy it.

If you are skilled enough, you can buy drinks and get entrance to the nightclub at a lower price than usual. Buy Mazecoin at a lower price, and when prices go higher, use them.

Risks

Mazecoin provides a lot of benefits to the investors, but on the other hand, it is not out of risk. At Maze, our team believes that we should be transparent and declare the potential risks involved in Mazecoin.

Like any other crypto coin out there in the market, Mazecoin is also volatile. We can not control it. The market value of Mazecoin solely depends upon the number of people who buy it or sell it. As of now, MazeCoin cannot be mined or earned any other way than bought. It's version 1.0 of Mazecoin, it has to see a lot of improvement in the coming days. The market value of Maze tokens may be highly volatile at the start but we can guarantee that it will become stable over time. We don't want it to be unstable. We don't want it to be the next USDT either, with no volatility. Besides these risks, if one is an expert in trading crypto or using it, they can time the market, buy the Mazecoin, hold it, wait till its value becomes high, and sell it.

Regulatory Risks

The blockchain industry is in the initial stage of its regulation. Governments of countries are in the process of studying blockchain technology, and some countries impose restrictions (for example, the United States, China, South Korea).

No legal documents are regulating the crypto industry yet - the laws can appear later and can significantly affect the activities of blockchain projects, including our project. We warn you that such laws can significantly limit and even stop the project activity, we are not responsible for the negative consequences associated with the possible regulation of the industry in the future.

Why Mazecoin?

From an investor's point of view, a question arises: why buy and trade with Mazecoin at the start of its launch? Why not wait for some time to let it be stable?

The simple answer to this question is that currently, the prices per token of Mazecoin are low and one can buy more tokens for less money. Once more people know about this adventure, they will buy it. It will be used in a nightclub for transactions. So, the prices per Mazecoin token will automatically become higher. So, it is wise to invest in Mazecoin at the very beginning of its launch since the prices are lower currently.

Tokenomics

The World's first nightclub crypto token's pre-sale to start from 1st June 2021 to 1st August 2021. The actual coin sale will start right after the pre-sale period ends. There are a total of 10,000,000 Maze tokens available in terms of the total supply. All Maze tokens can be purchased from the Maze app directly in the future or can be bought via an exchange for example Pancakeswap. All major currencies are accepted by the exchange. The live price of the Maze token can be monitored from the MazeCoin.dk website or one of the eligible exchanges. Maze follows the following structure for dividing incentives:

Key Features of Mazecoin

Some key features of Mazecoin are:

- ❖ **Secured and safe:** Mazecoin leverages a distributed peer-to-peer consensus network that cryptographically helps in securing every transaction.
- ❖ **Quick transfer:** Instant fund transfer globally is available with the help of fast block execution unlike traditional remittance, unmatched speed, and payment processors, thanks to the Binance Smart Chain network we use.
- ❖ **Decentralized:** Direct transactions among network participants without the presence of a central facilitator are enabled with the help of decentralized technology.
- ❖ **Easy to use:** User-friendly app controls and interface intended for seamless Real-world use cases (In development).

- ❖ **Scalability:** Assures scalability for pacing up with the industry's transaction requirements, thereby facilitating mass adoption of cryptocurrency.

Roadmap

Conclusion

Mazecoin is World's first digital decentralized Cryptocurrency for nightlife. Maze offers exciting benefits to the initial investors. Trading Maze is so easy, with just one click on the Maze app can let you buy or sell Maze tokens which can be used for entrance and buying drinks at Maze nightclub. Our Night club only accepts Maze tokens. We are at the initial stage of launch and we believe that the Maze token is going to change the concept of how you enjoy your nightlife at a nightclub and how you pay for things there. Pre-sale is starting so grab your Maze tokens early to be one of the first community members of Maze.
